For permanent labelling the highest demands are made on materials, adhesives, design and security. GWC has the necessary expertise and experience to provide custom-made solutions for our customers. These cover a wide range: type signs on machines, labelling of electronic components, batteries, labels for vehicle manufacture, engines, engine units etc.

STICKERS ON MICRO CHIPS

AUTOMOTIVE - ELECTRICAL

The requirements regarding durability at different temperatures, protection from outside influences, liability and security are met through the individual choice of material and design in each specific case or are worked out together with the customer. This is substantiated by the variety of solutions we have found for well-known manufacturers.
